

Research & Development

eSports Lounge

A new eSports Lounge was added to the GFAFB fitness center, with the inclusion of all next-gen systems such as the Nintendo Switch, XBOX Series-X, top-of-the-line gaming PCs, and VR. With less than 10 of these facilities stateside, GFAFB is one of the few truly connected Air Force bases that aims to create their own professional gaming team to take on leagues and tournaments worldwide.
